

## Reliv Now for Kids *Health Stories:*

**Ivy Christine Pasion and son Elijah**  
*Valenzuela City, Philippines*

"Elijah was diagnosed with delayed development when he was four years old. He struggled with expanding his vocabulary, could not keep still or make eye contact with others. My son's inability to grow at a healthy pace simply broke my heart. That's why I felt relieved when I found out about the wonderful products of Reliv.

After one week on Reliv Now® for Kids, Elijah was able to utter a complete sentence; after three weeks, he started telling me stories and after another four weeks he was able to follow complex instructions. He's been attending speech and behavioral therapy sessions in a special school. But just recently, Elijah's teacher confirmed that he could enroll in a regular class. Reliv is such a wonderful blessing!"

**Theresa Sun with kids Noelle & Gabriel**  
*Singapore*

"My kids did not have any major health concerns. When I started giving them Reliv Now For Kids, I wasn't really hoping for any specific health results – just like any mother, I just wanted to keep them healthy. After a month on Reliv, it was Gabriel and Noelle's swimming coach who first noticed the positive changes in their health. He said they are now more energetic, have stronger endurance, stamina and strength. They also started improving their swimming time records.

My kids are growing up healthy and enjoying an active lifestyle. Noelle is also a member of the school's track and field team and involved in taekwondo. Meanwhile, Gabriel is part of his school's uniformed group and adventure racing team. Both kids often receive gold awards for acing their annual physical examination. Young and restless as they are, my kids look forward to engaging in more sports and school activities in the future."

**Donna See with kids Timothy & Patrick**  
*Manila, Philippines*

"My kids were prone to catching cough and colds especially when there were changes in weather or when they take cold drinks and eat sweets and desserts like ice cream. Because of that, we didn't encourage them to eat or drink anything cold. We also asked them to drink plenty of water to help prevent them from getting sick. But since I'm a working mom, I can't really monitor their food intake for the whole day and check if they drink enough water.

After learning more about Reliv and hearing stories of other children who experienced great results with the products, I was encouraged to let my kids try Reliv Now for Kids. I added one Reliv shake to their diet every day. Three months into the products, I noticed that they rarely get cough and colds. And if they did, I just add another spoonful of Reliv in their daily shake. I'm now confident about my kids' health because I know they get complete and proper nutrition with Reliv. When they ask me today if they can eat chocolate and ice cream, I always tell them it's okay because they're taking Reliv – and they smile at me."

**Gia & Jed Chan**  
*Manila, Philippines*

"We've been taking Reliv Now for Kids since 2002. Our mom gives us our Reliv drink everyday that's why we're always strong and healthy. We don't easily get sick even when a lot of our classmates are missing classes because of coughs and colds. And everyone says we're growing taller than other kids our age. We will always drink our Reliv shakes everyday!"

**Pia Mauleon & son Mel** • *Quezon City, Philippines*

"My 16-year old son, Mel, has been taking Reliv for three years now. On his second year of taking the product, he became a consistent honor student and the year after that, he became a consistent 2nd honor student. He entered several sports this year: basketball, futsal, soccer, and swimming. Incidentally his basketball team won the championship in the year level intramurals and 2nd in the school wide basketball league. Reliv has provided not only good health and stamina, but also given him confidence leading to his intellectual, physical and social development. He loves Reliv! Mothers out there, wouldn't you want that for your kids?"

**Vivian Sanchez** • *Palompon, Leyte, Philippines*

"My son Justin was diagnosed with ADHD (Attention Deficit Hyperactivity Disorder). He had a problem focusing on his studies and his teachers had a difficult time handling his unpredictable temper so he had to stop attending school for awhile. But after taking Reliv Now for Kids for three months, Justin showed a lot of positive changes in his behavior. He started to become more cheerful and friendly. He has also been able to focus on his lessons, participate in class discussions and improve his grades. He is now very eager and excited to study and our entire family is so happy!"

**Milo & Micoh Co** • *Binondo, Manila, Philippines*

"Our parents used to worry about us because we both suffered from weak immune systems. We would easily get sick and had to miss a lot of school days. We couldn't join sports activities or play for a long time with other kids because we get tired easily. Our family spent a lot for our medicines every month. When our mom gave us our Reliv Now for Kids shake, we were excited because we love chocolate and vanilla drinks. We always drink our Reliv to help us become healthier and stronger. Today, we don't get sick as much as before so we don't miss school anymore. We can also play with our classmates, go swimming and play table tennis. Our family's very happy now because we're enjoying a lot of activities."

**Arielle Ong** • *Manila, Philippines*

"Arielle Ong was diagnosed with developmental delay. At age 6, she was still unable to stand unaided, hardly uttered words and was still drooling. But when her parents John & Earleen started her on Reliv, they noticed fast improvements. "Arielle wasn't just able to stand up on her own but was also running around, dancing and jumping like any other kid. Arielle attends regular school, reaped academic awards, took ballet lessons and is now ready for college. Thanks to Reliv, Arielle is able to enjoy a fun, healthy and happy life!"

**Joyce Yee** • *California, USA*

"My son Kenny was diagnosed with a rare blood cancer and had 13 months of chemotherapy as an infant. It was a really scary time. Doctors told me nutrition could improve Kenny's well-being, but nothing I tried worked. After taking Reliv, I saw health results in Kenny right away! With Reliv Now® for Kids, Kenny doesn't get sick as often. His teachers have seen improvements in his classroom focus and performance. Reliv gives him the nutrition he needs to be a healthy, energetic 11-year-old!"

**Allen Claire Padero** • *Manila, Philippines*

"I love both the chocolate and vanilla flavors of Reliv Now for Kids. My mom said that she's very happy because I've grown healthier and stronger with Reliv. I study hard and focus on my lessons. I can easily remember and understand my lessons every day. My family's proud of me because I've been a consistent honor student in my class. I will never forget to drink my Reliv shakes every day so I can grow healthy and smart like my mom."
