Thea Set

Lunarich is part of my story but a very important one. I just got out of the hospital after having open heart surgery about a week ago. I was *finally* able to go home take my shakes, 24K , and lunarich in proper quantities (it was taken away from me in the hospital for which I was in 5 days).

In the hospital I started to go down hill a bit - felt like I was getting a cold etc; which wasn't good. But even with *no Reliv* the doctors where amazed at my recovery. I recovered faster than other patients and the surgeon even said that I didn't need to take to very big tests to get out . (which I did anyways just to make sure). Considering I had an ablation to steady my heart rhythm, the aortic valve, the root, the ascending aorta , and part of the hemiarch replaced.

Not a small surgery. The nurse's kept saying how healthy I looked and how quick I recovered. Now this is on next to *no product* just what I had built up from being seven years on the product.

And now? It is now Monday. I've had my *full set* of product . This on just the basic shakes, a half a container of small 24K and *one tab* of Lunarich X.

I just woke up from a nap , jumped up , ran to the phone - *totally forgetting* that I have a chest full of holes and a six inch scar on my sterum.

and I've just been home for *three days* ... I have to admit I was disappointed with my results for awhile now.. can't afford to take enough product to get to where I need to go.. (not that I was ever going to give it up.. just getting frustrated)... now?

I'm *never* giving up these products .. even if the company goes out of business and we have to start a kickstart campaign to keep it going..

I have so much energy right now it is unreal. I have to hold myself back - so I can heal properly . Thank god for my good friend who introduced me to this product . Sorry for the long post just really *really* excited.

Kelly May

I have O- blood type. I am called numerous times from United Blood Services for my blood. I am a member of the Gallon Club. But this last year I have struggled to be approved due to low iron. (yes, maybe not taking enough shakes, but since I always felt great, I really didn't do anything about it, plus I am a vegetarian) To give you an idea I gave blood Jan 2012. March, April, June & July I was turned away. I gave blood August 2012 then turned away Nov & Dec. When I knew I was going to go in today, I took 5 LunaRich X capsules yesterday and 5 this morning. My approval # was 12.9, the highest it has ever been! Some lucky person is gonna get some great blood!

Wendy Johnson Berg Stokes

So grateful - I just got an early Christmas Present! My friend and client Gary just got his final PET scan results after 2 years of fighting his recurrence of renal cell carcinoma (which is the same disease my husband Rick died from). In December of 2011 his check up showed 14 new lymph nodes loaded with cancer his recurrence of cancer came 24 months after remission from his initial diagnosis. One mass was on his aorta, the rest scattered throughout his abdomen. The chemo wasn't hopeful, it doesn't shrink the tumors it just holds the line of progression. We added Reliv and as the LunaRich came out we added it to his regimen. The chemo side effects dwindled. Metabolic tumor activity stopped, the masses were shrinking and disappearing with each new scan every 4 months. His weight came back on and now after 24 months - he has No Evidence of the Disease. None. Clean PET scans! Clean blood work! His MD was so

excited and I am grateful to God. He went from very thin and weak to coming out of retirement and returning to work in Construction part time for the last 6 months. He and his wife were giggling they are so happy. It is so much fun to see the effects of Prayer, medicine and Reliv. 16.5 years later, this business and and witnessing results doesn't get old! Thank you Lord!

Brenda Rouse

OK...I'm excited! Started a man Logan works with on the Lunarich X capsules (12/day faithfully taken). He is suffering from pancreatic cancer and was given 2 months to live. As of the beginning of October his cancer count was over 106,000. November's reading was only over 48,000 and ... get this ... I got a call from his wife last night ... she was having a bad day and got a call from his doctor, so she was expecting bad news ... his markers are at 16,400! He only has had a handful of chemo treatments because his blood work had been so bad. When his blood work was good in November, he had 1 treatment then had to wait a week as his schedule is 3 weeks chemo then 1 off. I have never met him personally but he invited us down to see him, so we are going Wednesday night. On cloud 9!...

Lois B.

Joyce, the pain under my left rib has stopped. My right arm was hurting so bad I could not lift anything a few weeks ago and now I am reaching up in my cabinet getting things out with no pain, in fact the pain in my body from my Lupus is so much better. I am taking 6 capsules of Luna Rich a day and am on ProVantage and Glucaffect which has Luna Rich in it. Reliv has helped me have a normal life for five years this coming January since I could hardly get out of bed.

Lynette Baldwin

Great News About My Mom!!! Most of you know that her Non Hodgekins Lymphoma returned 8 weeks after her last Chemo treatment. It showed up in tiny bumps all over her head that soon grew to be marble sized tumors. She also had 3 tumors on her upper chest and some on her tummy. A punch biopsy confirmed it was the Lymphoma.

The tumors were painful and itched. One day she had a brilliant idea to open a LRX capsule and mix it with water and put the paste on her head. In 2 weeks to her

amazement, all the tumors were gone! Except the one that had the biopsy that one kept growing because she wasn't putting any LRX on it. She was afraid to because of the stitches. She is now treating it and it is almost completely gone. That made her want to make sure she was taking her Now and LRX capsules everyday 4 times a day like she was supposed to.

She just went to see her Doctor today at MD Anderson, and he was amazed. He asked her about the usual symptoms that go along with Lymphoma... Are you having night sweats, fatigue, itching??? No to all of those. She is feeling great and has great energy!!! He checked her lymph nodes and they were all clear. He finally told her what you are doing is working... My recommendation is to keep doing it. He said he didn't have anything that worked that good.

It really is about patience, consistency and faithfulness.

Praising God for His tender mercies, Lynette

Cheri Laurin Otzenberger

All results are so wonderful to receive yet I'm particularly excited when a child's life is impacted! Here is a note from a friend whose daughter, age 10, struggles with ADD and extreme anger issues. "We are doing good. She is drinking it everyday. If she doesn't get it from me in the morning the school nurse is giving it to her. She went from depressed and not smiling to now smiling and laughing. She is doing good with it. The school principal and school nurse have both talked to her and are standing behind me with this. Praise God"

Susan Bushell

Healing results are happening with our friend in the UK with serious wounds one on his back that wasn't healing for over 8 months and the one on his head for over 3 months. He's been taking NOW , Innergize and LRX and his healing is shocking the doctors in London (they are willing to write a prescription for what he's using...anyone have any experience with insurance/prescriptions?) These are not little wounds ... these are serious, large wounds ... his body was so depleted as a result of 2 facial cancer situations, where it caused him to lose his right eye and then facial reconstruction due to an orange sized tumor in his cheek area ... with all the medications and treatment,

his body was drastically suffering and his immune system was shot but he is so grateful for the Reliv products and your thoughts and prayers....more later!

Rosemary DaRoza

I just wanted to share how the LunaRichX capsules have helped me so much with sciatica attacks. I twisted the wrong way yesterday and had trouble walking because of the spasms in my lower back and down my leg. I started with 2 caps every 3 to 4 hours. I think I took 8 yesterday but this morning I am walking normally.

I have also found the caps great with a headcold. I take 2 every 2 to 4 hours, as symptoms of sore throat, running nose occurs and in my experience it takes away the symptoms. Told my son to try this and it worked for him also.

Thank you Reliv for the LunaRich X capsules and all the wonderful Reliv products. They have given my life back.

Ronnie Buchino

My good friend called this morning all excited. "Wow" she stated "I can't believe how this LunaRichX works!" She underwent a right hip replacement last spring and was hobbling along and slowly recovered. Oct 1st she underwent the left hip replacement and is doing fairly well but just began taking a few days ago LRX capsules 3 in the morning, 3 in afternoon and 3 at night. "I can't believe my stamina, how focused I am and how great I feel! I walk so much better. When it would get cold, it would take me awhile to get my bones moving again because I was so stiff. I didn't have that issue last night when the temps dropped. I was able to walk around with ease. What a difference!"
Yep, thank you Reliv and Dr. Dr. Alfredo Galvez

Sandra Hayes

I decided to try Arthaeffect along with Reliv Now and Lunarich X, because I am in stage 2 Lupus and I suffer from arthritis. After a few days of taking Arthaeffect I noticed when I touched my legs physically they were sore, plus the Arthaeffect made me sick, so I cut down the amount I was taking; my body began to releasing flem. I now do not have soreness in my body and my arthritis no longer bothers me. Wow!

Valentina Wittrock

In February 2013 my friend been diagnosed with breast and bone cancer stage 4, in Yule 20 she start to drink reliv shake and 9 capsules per day of LX , on the beginning of August she got results of blood analys and MRI, results was very good, doctor see the process of healing, the Hollis in a bones start to covering and she feel tremendous power and absolutely shure- reliv work for her body! Thanks God and Reliv!

Joyce Yee

My aunt (in her 70's) decided to give Now + LRX a try. Taking just one shake and one cap per day. In one week, she felt so great her doctor took her off of her anti-depressant medicine! She is so looking forward to more results. God is so good. Loving Reliv more and more each day!

Janet Gildred

Another of God's miracles beginning with Reliv LunaRich and LunaRich X nutrition and prayer. A beautiful 12 year old girl has been in coma since January from a horrific accident where she was crushed and without oxygen. She was revived and then for many months no progress with coma, no recognition of others, no movement, couldn't speak. She is on a feeding tube for nutrition. For my Reliv friends who pray she needs prayer, but, there is hope! Reliv is being given by her Mom and in 2 weeks the Mom is noticing a difference in muscle behavior. Her right hand, right arm is now showing movement, she has increasing recognition through her eyes and facial expressions, she's showing more strength in her neck and even trying to hold it up in church and look around and is moving her legs more. It is a wonderful beginning of a journey for a heartbroken family. Once again I am thankful for this great Reliv nutrition, and thank God for giving this Mom and her little girl the hope of healing. Praying for a complete healing in Christ Jesus! Will keep you posted over time . . . I feel like I am posting too soon but there are already results and what if this could be an encouragement to others!

Diane S.

A friend's endometrial cancer showed up again after a 10 year absence. This time in the form of an inoperable tumor in the pelvis that involved joint, muscle, and major blood

vessels. It no longer responded to radiation. In June 2013, she received the report from Mayo Clinic saying that she had 5 new thigh tumors, Her CA 125 was around 300, there were one new lung and one new liver tumor growing as well. The pelvic mass was growing quickly. I connected her to my upline and as a result she began on 10 LRX/day only. No Shakes. The Drs. at Mayo also had her doing 2 kinds of chemo.

After a scan in mid-August of this year, the Dr. delightedly told her that her CA 125 was down to 72, Lung tumor was GONE, Liver Tumor is GONE, 4 of the 5 thigh tumors are GONE, The 5th barely noticeable on the scan. The inoperable mass had decreased by over 50%. Her Mayo Doctor told her that he was not expecting this, as when a tumor is radiation resistant it usually ends up being chemo resistant as well. She is going to be continuing on the LRX and doing only 1 kind of chemo this time. Her next scan is in about 6 weeks. I will keep you posted, and keep thanking the Lord for Reliv and His blessings everyday!

Cayla Collins

A distributor of mine introduced Reliv to her sister in August. The month before, her sister's pap came out extremely abnormal to the point where they wanted to take a closer look and possibly scrape the cells off. Two weeks ago she went in for that surgery and the doctors found NOTHING. They couldn't explain it.

Lawrence Short

Just got this message from a lady we are helping who is border line for leukemia:
Just last week I noticed that the varicose veins behind my left knee have been getting less and less. Also some spider veins on my legs have been fading away.
Had some good news today. I have not received my new blood test for this month, but did talk with the nurse. She was real pleased, my wbc had increased from 3.00 to 3.08. And another factor that helps in fighting off infections had increased considerably. I am anxious to get the full report.
I have been taking the NOW in the morning and evening with two capsules each time for the last month.

Sara Lay

My friend's granddaughter, age 5, had a bout of mono in January 2013, leaving her with

an intermittent cough that they said she'd always have. In May, when I started my friend on the NOW we started her granddaughter on KIDS NOW and 1 X capsule the same day. this was at about 1 p.m. THE child had been having a brief cough every 15 minutes to half hour. About 2 hours passed and we suddenly realized we had not heard her cough. she didn't cough the rest of the day. THIS continued and she was able to go back to school and not miss days. If they missed a shake, she would start coughing again.

The same child was diagnosed with Turner syndrome and on growth hormones. when I visited a few weeks ago, she had grown three inches since May, and the doctors said this was not supposed to happen with the hormones. We all know it is the Reliv.

Sara Lay

In May I put a good friend on the NOW and three capsules a day for an eye problem that had caused her vision to deteriorate for the past 6 years. THE doctors had her on steroids and a chemo injection with no results, and she had side effects of restlessness, swelling in her hands/arms, inability to sleep and so forth. She started on the products that day and the next morning woke up at 8 a.m, whereas before she was waking at 4 am and cleaning the house to handle the anxiety. Within a week she noticed improvement in her vision and the swelling and pain in her arms was disappearing. finally the doctors took her off steroids and just couldn't understand why she was doing so well. In July there was no sign of anything in her eye but they wanted her to stay on the chemo shot just in case.

Sandra Hayes

Well one of my customers bought Lunarich X because her doctor wanted to put her on high blood pressure medicine. After a few days on Lunarich X her blood pressure went down, and to this day her high blood pressure continues to drop down. I cannot wait until she sees her doctor again.

Heather Hastings Yasolsky

LunaRich X Capsules and my hysterectomy. My hysterectomy was Thursday at 7:30 am. I was awake to realize my hips hurt more than anything about 4 pm and took 3mg of pain killer in the pain "pump." Called husband and asked him to bring in my capsule

bottle. 2 capsules every four hours (4 capsules at the start). All night my blood pressure was fantastic. No pain medications. They took pump at 7am because I hadn't used it. No problems with urination upon removal of catheter. No problem with constipation since I arrived at home. I have stuck with 2 capsules every 4 hours, and my Now/Innergize shake 2 x day. Feel great, can barely tell I had major surgery 2 days ago. Love, love, love Reliv.

Ronnie Buchino

My good friend called this morning all excited. "Wow" she stated "I can't believe how this LunaRichX works!" She underwent a right hip replacement last spring and was hobbling along and slowly recovered. Oct 1st she underwent the left hip replacement and is doing fairly well but just began taking a few days ago LRX capsules 3 in the morning, 3 in afternoon and 3 at night. "I can't believe my stamina, how focused I am and how great I feel! I walk so much better. When it would get cold, it would take me awhile to get my bones moving again because I was so stiff. I didn't have that issue last night when the temps dropped. I was able to walk around with ease. What a difference!" Yep, thank you Reliv and Dr. Dr. Alfredo Galvez!

Barb Reisz King

Doing a tummies to toddlers booth and want to focus on young families. It will draw parents, single parents as well as grandparents. Any suggestions on how to promote LunaRich X as well as the Kids Now. Also looking for any suggestions for a banner to draw their attention.

My newest result is a window shattered and the spot that needed stitches was by my right knee. After the stitches came out on September 26 I started making a paste with the LRX and put it on my cut. It is just a little over a month and the scar is noticeably smaller. In the last few days I've been putting the Night Cream on instead of the LRX to see how it continues to heal.

Lou Ann Krompel Pecorelli

My husband had very severe veins in his ankles. The veins were even bubble like protruding. Most of his ankles were blue bubbled veins and swollen. Well, no more! . Drinking 6 shakes daily for leukemia and taking many LRX capsules, his ankles are white and no longer blue veins. Very amazing results when your body gets enough Reliv to heal itself. His eye prescription was decreased by 25% each eye. Never has that happened and he's lost 60 pounds. We are so grateful for LunaRich/ LunaRichX and the power God gave the body to heal.

Brigid Rubin

My mother has had a nasty gash in her 83 year old leg for over a week; it has been disgusting and not healing; she's been to the doc 3 times, etc...finally talked her into letting me make a little LRX paste to put on it and OVERNIGHT it totally scabbed over!! So psyched! Wish I had talked her into letting me do that sooner. Would have saved her a lot of aggravation. She gladly let me re apply it tonight!

Heather Hastings Yasolsky

Okay, I am ready to share my husbands LunaRich X capsule results. They are unbelievable and I didn't want to ruin it. In two weeks on 2 capsules a day we noticed he could not stay awake for 3 days, except to go to work. If he sat down in a chair he slept. Well, that is because his blood pressure medications were lowering his blood pressure too much with the LunaRich X also. We started monitoring his blood pressure and off the medications he went. He now takes 2 LunaRich X capsules when he gets up from 3rd shift, and 2 capsules before he goes to work. 3 weeks now and he is able to sleep during the day (he works nights), his blood pressure is down and he's off his blood pressure medication, and he is much more pleasant, patient, and fun loving. I believe LunaRich X works better than his anti depressants! Those may be the next medication to go after he goes to the doctor to get medically weaned from them. (Is there a nutritional result for like my husband again?) Still in love after 14 years. God bless Reliv.

Debbi Robinson Murphey

A college friend's husband was diagnosed with stage 4 esophageal cancer a few months back. In less than one month on only LRX a PT scan showed the tumors had shrunk 50-70%!!! He'd had a round or two of chemo but Doc credits the LunaRich X and is calling it a "miracle!"

John Curtin

Hey, **James** here, and this is my Reliv testimony. I am 23 and was born with cerebral palsy. I was introduced to the Reliv products about 9 months ago by a dear friend of mine who I met in church. This man had been a Reliv distributor for many years and I got to hear all his stories.

All the stories he told me sounded good, but I didn't really expect it to do me any good. I had been told all my life that there was nothing that could be done for brain damage, which is the cause of cerebral palsy.

After about 3 months on Reliv Now, Reliv Now 4 kids, and Innergize, my movement had become more controlled and more coordinated. I wasn't having as much involuntary movement. My balance has improved, and I don't fall down as often as I used to. When I eat, I don't make as big a mess. I have a speech... impediment, and people are now understanding me much better.

Heather Hastings Yasolsky

Greetings. I wanted to share this new tidbit from LunaRich X. I Have surgery on Thursday so I moved myself to 4 capsules every morning this past Thursday in preparation of healing. I was in the pool with my girls today, and we noticed that my ankles are no longer vericose purple. (Ladies you know what I mean.) If you look close the "spider veins" are a very light pink. Only the one large vein remains purple, but significantly different in look, doesn't protrude, has some spaces of clear in it. This is amazing to me! How these capsules must work for this to happen in 4 days. I was already using 3 to 5 points a day before this Thursday. Love these products!

Angie Den

Hello, my name is Angie Den (Angela Denis). Today makes it a week since my children (son, of 4 yrs and daughter of 3 yrs) have been sick and have been giving them the Kids Now and LunaRich X. They are now recovering, getting their appetites back and my son, reciting the "Lord's Prayer" almost verbatim by himself without any help from mom.

Norma Carlozzi

3 weeks ago I had a freak accident where I fell off a staircase & broke my ankle in 3 places--my foot hung by a thread off my leg. I had to wait for 2 hours in the ER while being x-rayed & admitted into the hospital for surgery. During that time I took a whole bottle of LunaRich X--I opened the capsules & poured the powder under my tongue for faster absorption--one every 5 minutes, & EVERY nurse,, doctor, & technician was amazed that with such a severe injury I should've been screaming, they said. I started taking shakes every 2 hours, along with the LRX caps, to heal quickly & I am way ahead of schedule! Thanks Dr. Carl & Dr. Galvez!

Angie Dout Rusch

Cholesterol down another 10 points!! 200 in February, 190 in July, and now 180!

Karen B Turner

A friend just sent this message about his eyes.

An interesting thing happened. I had to have my eyes retested for glasses. Six or seven years ago, when I had this done, I had to buy special glasses costing almost \$500.00. This time, the doctor said my eyes looked great, and I only had to buy reading type glasses, a huge change. And, even with the eye test, it was only \$159.00. Boy was I excited.

Janet Gildred

Although in the hospital and direly ill for 3 months Dad was taking Reliv 4X/day through a feeding tube. A month or so after coming home (with home health care and "not hospice") his blood work indicated his PSA was at the level of 0.6 A couple months later he had bad sciatica pain and in the process was given 3 LRX in his 3 shakes per day. Within 4-5 days his total sciatica and foot pain was gone. He continues with the 9 LRX per day. Last weeks blood test results showed his PSA at 0.18! (and at 92 the Dr. gave him an A report on his blood work). Praise God and thank you Reliv! If I hadn't mentioned before he no longer uses a feeding tube, can eat and drink normally :) , no aspirating pneumonia or congestive heart failure. Although weak he is up, walking on his own and enjoying family, friends, church and outings with Mom! Praise God and thank you Reliv!

Lauren Laird

So I had a cut on my thumb. Nothing horrible, nothing life threatening but annoying. I put a tiny dot of Lunarich X on it and covered it with a band aid. 4 hours later I took the band aid off to check on it and it's basically closed up. Absolutely incredible!! I was afraid bending my thumb to text would reopen it and it hasn't.

Gary John Kolosey

I got bit by a brown recluse spider on the Fourth of July and was not able to go to the hospital because it was storming pretty bad. I tried everything we had around the house to stop the swelling and blackened skin, but the thing that worked was packing the wound directly with lunasin powder from a LunaRichX capsule every four hours. I have only a small scar as a reminder of that close call.

Lynette Baldwin

Great News About My Mom!!! Most of you know that her Non Hodgekins Lymphoma returned 8 weeks after her last Chemo treatment. It showed up in tiny bumps all over her head that soon grew to be marble sized tumors. She also had 3 tumors on her upper chest and some on her tummy. A punch biopsy confirmed it was the Lymphoma.

The tumors were painful and itched. One day she had a brilliant idea to open a LRX capsule and mix it with water and put the paste on her head. In 2 weeks to her amazement, all the tumors were gone! Except the one that had the biopsy that one kept growing because she wasn't putting any LRX on it. She was afraid to because of the stitches. She is now treating it and it is almost completely gone. That made her want to make sure she was taking her Now and LRX capsules everyday 4 times a day like she was supposed to. She just went to see her Doctor today at MD Anderson, and he was amazed.

Lori Doerneman

My husband, Russ Doerneman, has been on RELIV products for nine years. Has had great results but could never get rid of plantar warts on the bottom of his feet, no matter what he tried medically. Last night he showed me his feet. No warts. What did he add? LUNARICHX capsules six weeks ago.

Nicolette Marlow

"Almost 4 months and I'm in remission with just a scar on my lung. LunaRich x and reliv now really help. I haven't had 1 single chemo treatment all I did was eat healthy and take lunaRich and now. I am cancer free. Also lost a few pounds but I'm more excited to be cancer free!"

Heather Hastings Yasolsky

Not sure these pictures do justice to the situation. My oldest daughter played with a guinea pig, and the end result was contact dermatitis where she used to get eczema on her inner elbows, and an allergy attack. One LunaRich X Capsule in her, one broken and made into a past on this horrible elbow. She could not bend it, it was swollen a bit over .25 inches off the rest of her, with that lovely red ring around it. She would not let me retake picture until it completely stopped hurting. That would be 8:00 pm last night, and then 9:42 pm last night.

In the second picture her skin is completely NOT swollen, and just has some pink to it. She could bend the elbow completely. She had LunaRich X capsule, and one on her skin and then after I got off the Reliv call I was on and she was clearly having more allergy related issues she drank a Now with LunaRich, had another capsule, and 20 minutes later she had a Fibrestore in Orange Juice. The combination ended her breathing problems as well (I was out of Innergize). Nutrition is a wonderful thing. Before Reliv this would've been an emergency room visit to figure out what was going on, cause it was a Sunday night.

Rosemary Daroza

Yesterday my sciatica went out and I felt my back tense up. Took 2 caps immediately. After aggravating it again, sitting in the computer chair, couldn't walk without spasms, took 2 more. I took 4 more caps over the next 6 hours and woke up this morning without spasms. Remember I had no pain; just couldn't walk.

I will keep taking 1 to 2 caps today until feel this resolved. Thank you Reliv.

Keith Roberts

So I have a retail consumer who wanted in on the Reliv, LunaRich X. She went to dermatologist with some suspicious spots on her skin. After the dermatologist felt they were suspicious enough and wanted a biopsy, she instead went home and applied a paste of LunaRich X with water to the spot on face.

After one week, the spot was gone. She contacted me all excited with the news. Then she figured, hey, I will try it on the other spot, a place on the back. She did likewise and after another week, spot was totally gone. She purchased at retail and since these spots disappeared, she saved herself the expense and time of revisiting the dermatologist and instead has requested I keep a supply of LunaRich X on hand for her!!!! The stories keep coming and feeling blessed we have something special in LunaRich X.

Liza Hernandez Johnston

Started a customer on the capsules... his PSA was going up and he has had surgery before for Prostate Cancer. He ordered one small bottle of LunarichX on Sept. 19th. Started taking pills once delivered.. 2 capsules on empty stomach each day and had his blood drawn on Sept 30th.. This is what he wrote to me today!!!

My PSA went from 0.19 to 0.15 using your Lunarich along with my others herbs etc. I placed another order directly for a bottle of 120 capsules and should be here this week. I take two a day on an empty stomach. Praise the lord the PSA is on the decline. I meet with the radiologist on Oct. 7 but on am going to tell him I am going to hold off for now until after my next PSA test in Jan when I meet with the Urologist unless the Radiologist wants to have it checked sooner. Thanks again!

Dave Zuro

I just spoke with Stan from Hayward, CA who called me a month ago to inquire about helping him. He has prostate cancer with a PSA of 119 when he started on the products. His PSA rose to 123 and his doctors told him chemo was the only treatment to prolong his life. He started taking products 4 weeks ago, PSA dropped to 70 (30% decrease). Doctors are blown away. He is not doing chemo or radiation. Changed his diet and now has hope with Reliv products!

April Reynolds

Here are a couple of small results that lunasin has helped me and my sister with, just to show the range of things that it can benefit:

1. I started getting that burning/tingling on my upper lip that let me know I was coming down with what I could tell was going to be a huge cold sore. I decided to make a thick paste of lunasin and water and put a small amount on the area. I left it on for a few hours that AM (covered with half of a small Bandaid) and again reapplied it when I went to bed. The next day, when I would have expected a huge cold sore, I only had a tiny dot that looked like a small freckle. The following day it was a tiny scab and on the third day it was gone!

2. I visited a friend who has cats with flea problems and could feel the fleas as they bit my legs. Normally I have a pronounced reaction to flea bites that lasts for days. I am taking 6 LunaRichX capsules as a matter of routine and didn't really think about it helping. I had a little itching the first hour or so. However, by the next day, I could hardly tell that I had any bites at all. What a wonderful surprise that was for me!

3. When my nephew got a spider bite recently, my sister recalled my experience with my cold sore healing and decided that she would try the same approach with his spider bite. After applying a lunasin and water paste to the site of the bite, his bite healed up quickly, in just one or two days. (This is contrast to my sister who had not tried this on herself when she had recently gotten a spider bite and her bite was large and hard and swollen for 2 weeks!)

Debby Castleberry

Just to let you know some of my result so far is: 1 my knees have been really bad. If I tried to get something out of my lower cabinets or kneel down on the floor I could NOT get up!!!! If I sat at a restaurant when it was time to get up I couldn't get up or walk for the the first few minutes without bracing on something. I have tried, steroid shots (I had a bad reaction to), the 4 injection Shot they hurt, and physical Therapy. They helped but not for long. I have been on the product for less then a month and I NOW can get up from the floor with NO help!!!!!!

2. I have worn glasses sense grade school. They say I have cataracts and I got glasses about May and they worked for about a month and my eyes got worse and I could hardly read. I had to put them on as soon as I got up to see! Last night I realized that my eyes felt like they were being pulled out. So I took my glasses off and realized that I could see without them!!!!!! It isn't perfect yet but I can see to read and type this and that wasn't possible before. I should add that I have stigmatism the other reason I needed glasses. I have an eye apt tomorrow so can't wait to see the results.

3 I have a heart problem and my doctor didn't want me to lift anything or exercise, but when I told him how well I felt with walking and lifting some boxes he told me what to watch for and gave me the ok. My energy is getting better and I'm looking forward to better heart test in 6 weeks.

Robin Lane Allsopp

My son who is 14 yr old started having terrible ACNE, since March, all his forehead and nose. About 2 weeks ago he started taking 4 to 5 LunaRich X capsules a day.

Tremendous results. His forehead is almost cleared up and none on his nose. He is soooo excited. I had gone away for 5 days and when I got back just looked at his face and could not believe how clear it was! So happy for him! He is faithful with his LunaRich X. (He also has been on Reliv for 8 years)

Theresa Lawson

So wonderful! Just helped a friend become pain free with 5-7 Lunarich X capsules per day! She had suffered with sciatica for years, had been seeing the chiropractor, and found no relief. After only 3 weeks on the products, she is doing great. Awesome stuff!

Lou Ann Krompel Pecorelli

My friend Gaylene has MS. She was experiencing diarrhea for about 3 months before finding Reliv. She also has back pain. She took 4 LunaRichX capsules and in about 20 minutes was bending her back. Said she hadn't been able to bend like that for some time. She started on Now and Innergize. Her diarrhea is gone. She has energy.

A couple of weeks ago she took a bad fall and was in a lot of pain. She took 5 LRX capsules 3 x a day for 2 days. Then went out and mowed her lawn. She said she hasn't been able to mow her lawn for a couple of years due to her MS. She's very happy with her results.

Maria van Olphen

My younger brother, Paul, confessed. He said when he goes out with his friends and gets inebriated (drunk), he would feel that dragging hang over for almost a week. The took 2 LunaRich X capsules in the morning after his happy hour the night before.. He was so amazed that felt great and energized that morning and the rest of the week. He didn't want me to share this story because it was silly.. but I told him I just want to share the story..

Sandra Hayes

Diarrhea was a part of my daily life, until I started taking Reliv products especially the Now. My life is normal now...

Lou Ann Krompel Pecorelli

My friend started her son on Reliv last June. He has a fatal cancer brain tumor. He was weak and not doing well. Also had Hepatitis. He's been taking 6 LRX capsules daily along with some Now, Innergize and Reversage. He had a hard time keeping the Now down as he was on so many medications along with cancer treatments. His immune system has strengthened with LRX and Reversage that he now can keep the Now in his system. He's was walking with a walker now using a cane. Has more energy and the plum size tumor has not grown. He is increasing the LRX to 10 to see if the tumor will shrink. He calls the LRX capsules Pecorelli capsules. So grateful Dr. Galvez shares!!?

Sandra Hayes

This past winter for the first time in my life since having Lupus, I did not have to wear layers of clothing just to stay warm in the winter. Instead of wearing three coats, three pair of pants, three shirts, and the pair of stockings, plus socks. I was able to wear normal clothing and I stayed warm! Thanks to LunaRich.

Shalin T Clark

Sandy Peake told me what happened to her friend. He's had really bad neuropathy in his feet, and after a few days of being on the LunaRichX he had the best night's sleep in a long time! The neuropathy is going away!

Karen B Turner

I am so excited for my friend Traci York Bleyl. She was diagnosed with shingles, told it would last 3-6 months, and given pain pills. She took lots of LunaRich X, NO PAIN PILLS, and the shingles were gone in 1 week. She is one HAPPY LADY!!!

Karen B Turner

I just heard this from a friend.

I have a customer who has been taking Reliv faithfully for 7 years. Significant back pain (multiple surgeries, two rods in place) and taking 4 narcotics a day to control the pain. Unable to reduce pain meds. Added 2 LRX daily in February, then 3. When consuming 3 LRX daily, he took 3 narcotics over 10 days, versus what would have been 40 in 10 days. When he increased LRX to 4 a day, he totally weaned off the narcotics in May, with no withdrawal symptoms. He remains narcotic free and is more than pleased.

Lou Ann Krompel Pecorelli

My friend Jackie started on Now and LunaRichX capsules the first of September. She was concerned as there was a little hole in her heart and she was having heart palpitations. Talked with her on Sept 19th and she feels no palpitations and she's feeling better.

Rhonda Martin

The other part to my story is that I have also been diagnosed with PCOS (poly cystic ovarian syndrome). It causes insulin resistance and it can be hard to have children from the fluctuation in hormones. We have 2 beautiful little girls now, the oldest is 2-1/2 and our youngest is 3 weeks I used Reliv as a prenatal exclusively and my oldest has only had 1 sick visit to the doctor. We started giving her Kids Now at 3 weeks along with her formula. She LOVES her chocolate shakes today!

Adding in extra LunaRich X has helped her get over a cold in 1 day. As a baby, she was never fussy and didn't cry like I always thought was normal. And she's a smart lil girl too. I think she's alot smarter than I ever was at that age! Our baby gets vanilla Kids Now with every bottle, as well as 1 LunaRich X capsule opened up into her bottle at her last evening feeding. She's been sleeping 5-6 hours at night since 2 weeks old! And she's growing like a lil weed. Such...See More

Heather Hastings Yasolsky

My own LunaRich X story.... I hadn't even realized it cause summer is almost over. I have ankles that are not blue with spider veins! I have been faithful to capsules for 6 weeks, starting with just one, then moving up to find my LunaRich point. My "point" is 5... just realized that two weeks ago. The deeper varicose veins are still there.....but the baby spiders are gone! Here's to hope that next year I can wear shorts again..at 44 years old!

Rhonda Martin

I've been taking the Reliv products for 3-1/2 years now. I started them a month before getting married to my wonderful husband. We had been praying and desperate for anything that could help the seizures I had been having. They came numerous times throughout the day for a number of months and dictated what we did and where we went- they were called pseudo seizures (they are caused when too much stress bottles up in me, also I'm more prone to them from the 2 bad concussions I had on the same side of my head).

I also have chronic Lyme disease which affected my heart, lungs, brain, eyesight, joints, muscles, hearing, glands, pretty much attacked my entire body. I was so exhausted that I couldn't wash dishes more than 5 minutes, and I was spending most of my day in bed. I felt hopeless. I wasn't sure how much lower my body could get.

God answered our prayers in a HUGE way by bringing Reliv into our lives at the perfect time!!! I was pretty much symptom free of Lyme on our wedding day!!!! I have also only used very minimal antibiotics.

Today my immune system is so much stronger and allows my body the ability to keep fighting off the Lyme without using antibiotics. Using the Lunarich X capsules I've noticed even more energy, more mental clarity, memory is better, and my body handles stress WAY more than it ever did! I don't get pneumonia at winter or deal with all the colds and coughs I used to get all the time. Reliv products have saved my life, and God answered our prayers by leading us to it. PTL!!!

Mika Patch

My Japanese friend got a large lump on her thigh along her lymph nodes, and her doctor told her that she had to have an operation to remove it. She started taking 2 LunaRich X per day, and after three weeks or so, the lump went down to a size of her pinky. She told me that she will continue to take LunaRich X to see if it will completely go away. Thank you, Dr. Galvez! We need to bring LunaRich X and Reliv to Japan!

Maria Peters

Hi , I my name is Maria and I live and Ontario Canada . I am a stayed at home wife and a Mother. We have 3 daughters. We have been on reliv for a little better then 2 years we have Many, many amazing results a lot more then we were expecting to see. When the LRX came out we added them.

We have a daughter who suffered from ear infections all the time after putting her on the Optain and Now we so good results. 2 months a go she got another ear infection and her hearing was bad again, the doctors told us to give her 3 months for her hearing to come all the way back. She started taking the LRX and After a month her hearing was as good as it should be.

WE Love Reliv !

Heather Hastings Yasolsky

I was visiting my parents with my children. The grandparents have a pool... a ton of fun for my children. With my Mother and I sitting on the pool deck with the girls they were running and jumping into the pool (severely now allowed by the Grandpa).

Well, my oldest got her foot caught between the pool deck and the pool as she jumped in. My Mom got to watch it, and expected a broken ankle. It began to swell, and you could clearly see where her big toe tarsal was... it almost looked like a blister. I didn't have much Reliv with me.... Classic and capsules.

My daughter refuses Classic. So, I went in the house, gave her 1 LunaRich X capsule, and got her dressed for the Emergency Clinic. We arrived at the clinic about 20 minutes later and my mother said "look at her ankle, its not swollen, and the bruising is gone, they are going to think we're nuts."

From a Non-believer in Reliv that was huge. Not broken, healed and ready to go in 4 days after I got her to our home that night and added Now to her capsule regiment. TRULY AMAZING. I've been with Reliv since 2006... and am more grateful now than ever before for Reliv.

Sandra Hayes

Ask me how I won the lottery twice. Once monetary, twice with Reliv. I am living with Lupus. Lupus runs in my family. My cousin had Lupus, she is now deceased. The medicine she was on did not prolong her life. I did not want to follow that path. So I prayed for help. God answered my prayers, Reliv! The product Now has made all the difference in the world. My doctors are wondering why I am doing so good. I will not take the medicines prescribed to me by the doctor who is treating my Lupus. I cannot wait to tell him about Reliv...I have had so many blessings since I have taken this product but I do not want to bore you. I will tell you later.

Jana Ford Jones

A friend was diagnosed with stage 3 throat cancer last Tuesday. He was told to expect his breathing to become more difficult and since he would not be able to swallow soon, they would be putting a feeding tube in his stomach. He was scheduled for a tracheotomy today.

They contacted me Thursday to see if Reliv could help him. He started on 4 shakes a day Friday with 3 LunaRich caps with each shake. By Saturday, he was breathing better and his throat was not as sore. By Monday he was eating cereal, sounded very strong over the phone and had been riding his motorcycle.

Today, the doctor told him that the inflammation had improved so much that he did not need the tracheotomy in order to do the biopsy! Will keep you posted on what happens next!

Joyce Comjean

I have suffered from RLS, as a child, I thought that was me just being tired. I also suffered from IBS as a child, my mother told me that the doctors said it was my nerves.

I developed Eye Floaters, I was 5 months pregnant, in Disney, 90 degrees, thought it was heat exhaustion, but when I got home and had my son I still had the Eye Floaters. I also developed Veritigo, but refused to take the medication because I was still nursing my son.

Within the first month I was no longer bothered by any of these issues. My kids 9 years old and 13 years old never missed a day of school even for a cold in the past two years. I stated giving the LunaRichX to my 9 yr old a long with his shakes and he has now stopped wetting his bed. Started products in 2006

Maria van Olphen

One morning, I was running late for a very important can't-miss appointment. I didn't want to leave the house without breakfast, or at least, my Reliv shakes. I took my chances by taking 2 LunaRich X capsules instead, and then rushed off to my meeting.

I was so focused on my meeting that I forgot to eat later.. It was passed lunch time and I did not feel a lack in energy, no hunger pangs, and I was just feeling great !... and to think I am a Type II diabetic. I would have been sweating cold already had I not taken those LRX caps.. I really felt fine the whole day.

I love LunaRich X !!! and oh, I normally take 2 scoops of GlucAffect and 1 scoop NOW daily for my blood sugar management.

Coreen Witt Huff

I slept well before but wow...taking two LunaRich X caps before bed is amazing!! Definitely an even deeper sleep and dreaming more...or at least remembering the dreams more! Can't even imagine what else my body is repairing while I'm sleeping!! Woohoo!

Jerry Burelison Usn Ret

Just received a call from my friend Bill that I put on LunaRich X in April after our 50th class reunion. He took the capsules as told and his PSA dropped from 9.8 to 1.8 in two months of using the capsules. He just called me to say that his PSA dropped again down to 1.6 - another great day for Reliv!

Brigid Rubin

Last night at around midnight I got woken up by my 17 year old in a massive sneezing fit; one after another after another on and on....so I went to the kitchen and grabbed 3 LunaRichX tablets and some water and gave them to him. I thought maybe in a half hour or so this will help calm him. Well, much to my pleasure and his nose's pleasure he sneezed ONE MORE TIME that's it!!! It immediately calmed his sneezing to a few nose blows and some peace and quiet! Nice one!

Ashley Croft Pugmire

Yesterday my son woke up and his entire body was covered in hives. The back of his legs were SO bad it was just a solid hive. He had had an allergic reaction to penicillin. This photo is of him this morning. I took a Lunarich capsule and opened it up and poured a little bit at a time under his tongue. By 11 am his hives were really bad again over his entire body. By 4 pm there are no hives on his body anywhere. Amazing!

Anne Kindinger

I am working with Larry who was diagnosed with pancreatic cancer in June 2013. At the time of diagnosis his tumor measured 4.5 cm. In July he found out that his tumor had doubled to 9 cm and that there was a spot on his liver and several "nodules" on his stomach. Thanks to a mutual friend, I began to share Reliv with Larry and Carol; and Larry decided it was the only HOPE that he had.

After 2 days on the product Larry was able to stop taking Vicodin for pain. He began to be able to sleep in bed comfortably and was getting 5-6 hours of sleep instead of 1-2 hours in his recliner. His energy and stamina increased and he was able to get outside to work on his farm.

After only 3 weeks of using Reliv Larry went for a second opinion and some more tests were run. They found out that his tumor has shrunk to 7.5 cm, the spot on his liver is gone and there is only one nodule left on his stomach!! Not only that...he has a spot of melanoma on his ear that he continually has to have burned off...and it is GONE!!! Larry feels GREAT and says he wants to live this way for the rest of his life. He is so incredibly GRATEFUL for Reliv.

Karen B Turner

Never in my life have I heard this happening in Reliv.

One of my MA's had an ingrown toenail that had to have surgery. Very infected to the point that no anesthetic would even numb it. Toenail surgery done and David was on the typical Antibiotic and also some topical creams with some kind of RX in in....See More

Brenda Meek

Short and sweet, my partner went for his 3mth check up at dr this morning, his doctor wants to know what hes doing as his blood pressure is the lowest its EVER been and his heart rate has dropped 10beats a minute. ive got one very happy hubby we are taking 1 capsule and Now daily

Sandra Hayes

I went to my General Doctor who confirmed what my Lupus doctor said I no longer have high blood pressure

Judy Bee

So....the Bad news is that I was diagnosed with Parkinsons Disease this last November. Wow. Still in denial. The Good news is that I am showing marked improvement in my walking and balance and fewer tremors and "freezing" this past week after adding Reliv's Lunarich X to my diet daily. I don't claim a cure, I just know it is working for me and I am so, so grateful! Beautiful day!

Thanks Judy for sharing! Amazing results are happening with these capsules!

Tami Howell Martineau

My son has already had amazing results with Autism on the Reliv products. In fact I didn't know if he could get much better. But, in my heart I believe that Autism has a genetic link so, I started Gray on the LunaRich X capsules the first day of school...2 capsules with his morning Reliv shake and his 1 oz of 24K. After school, he had speech therapy. At the end of his session the speech therapist walked down the stairs and said, "I know you told me about Reliv but how long has Gray been on the products?" I said "10 years". She said, "Well...what did you do TODAY?" I said "Why?". She said, "Gray did 30% more work than I have ever seen him do and he was focused the entire time!" So, 9 hours previous to that he had his first 2 LunaRich X capsules. Pretty sure we just took Gray's nutrition to a whole new level! - Feeling grateful!

Nikki-Sara Mary Mitchell

I'm so happy....proof what nutrition can do, and feeding the cells that made us in the first place....shows ANYTHING is possible....I've just got my first 28 day cycle! I'm still going, but I'll probably get it today....but I've not have a 28 day cycle for YEARS....And I got a strong strong fertility sign that I haven't seen since my early 20's....nutrition is everything and can pretty much solve anything, hopefully more exciting news to come in the future, grinning a lot today :0)

Coreen Witt Huff

NEW RESULTS!!! JUST GOT OF THE PHONE WITH MY MOM!!! My mom just started taking 2 LunaRich Xcapsuls at night before bed the last 3 nights. She has had major sleep issues. The last 3 nights she has been able to go back to sleep after waking up around 2:30am (she would normally be up for hours) which is causing her to wake up more alert and ready to do stuff!! PLUS!!! She has less stiffness in her body waking up!! Whoa...Sweet!!! She takes a NOW shake in the morning and it has kept her colitis in check for years....unless she slacks off. Praise God for creating bodies that can repair themselves with great fuel!

Jennifer Ellis Eaves

I love giving people hope! Recently I met a man who had been in a horrible car accident, for years he has suffered with debilitating pain. He has had numerous neck and back surgeries, his pain level was a 9 or 10 every day. He has tried many things that haven't worked but was open for answers, he said he could not live with the pain anymore. I started him on LunaRich X capsules and Reliv's basic nutrition 3 weeks ago and I just received this text from him..."I am having great results with Reliv, the pain in my neck and back is GONE, I still have some pain in my leg but that is getting better too." I was super excited for him and called to talk to him after receiving the text. He thanked me for sharing and said "I can't believe how well this stuff works, my wife, brother, and nephew want to start taking Reliv too." Awesome, more people that will have great results on these wonderful products. I love Reliv!!!

Joyce Yee

A long time distributor has seen her Rheumatoid Arthritis pain decrease and her energy levels go up. Anne, was diagnosed with RA at 24. She's lived with RA for 20 years now. Recently, she added LRX to her shakes; Now+Innergize+1 LRX, twice/day. In a very short time, Anne noticed even less pain and more mobility. In fact, her rheumatologist says she is the healthiest patient in her practice. And, the doctor has since taken Anne off methotrexate (chemo). The doctor expects to remove her from Enbrel in a few more months.

Anne is so excited, she made what she calls a step of Faith and came in as a MA this month. She is sharing her remarkable story with everyone. Her goal is to replace her income so she can be a stay-at-home mom to her two young boys. She's well on her way to doing just that! LRX is amazing!

Nan Lovelace

My roommate who just moved in 3 months ago, I noticed right away in the morning she could not breath, no air, totally unable to breath through her nose. 7 years of nose spray! I couldn't take it, I put a bottle of capsules out on table and told her that she needed to get the inflammation down, she agreed and 2 weeks on 5 a day, she was throwing that nose spray in the garbage!!!!!!!!!!!!!! She is now a M. Aff!!!!!!

Roger Broberg

This happened in 4 weeks on 6 LRX capsules a day. Cholesterol 197-164. Triglycerides 171-147. Glucose 93-80. HDL 18-22. LDL 145-113. Ratio 11.2 to 7.5. WOW!!!!!!

Tami Howell Martineau

I had been diagnosed with a precancerous spot on my eye lid. My doctor wanted to send me to a dermatologist and then to a plastic surgeon to have it biopsied. Instead, I started the LunaRich X capsules, 2 in the morning and 2 in the evening. In 2 weeks the spot was no longer there. I'm grateful I didn't have to have a chunk of my eyelid cut out. Yeah for LunaRich X.

Mike Greenwood

My daughter was complaining about her knee hurting her so much and the swelling, she could not even bend it. I gave her 5 LRX capsules, the next morning the pain and swelling was gone, she is a believer. Her daughter (my granddaughter) had a pain in her stomach, she went to the doctor and they could not help her so they sent her to the hospital, they could not help her either. She came to me, I gave her some capsules and the pain went away, she is sold on LRX.

Lynette Baldwin

So an astonishing thing has happened to my mom. She has been battling Non Hodgkin Lymphoma. It returned after her first round of chemo and it looks like it is back again after finishing her second round of treatment in April. She started getting bumps on her head and they were growing fast. She had several in other places as well. One grew to the size of a quarter and they were itchy.

She got the idea to open a Lunarich X capsule and mix it with water and put it on her head. She left it there over night, it quit itching... but the miraculous part is that in 2 weeks of doing that they are gone, all except for the one that they biopsied. She wanted to wait until the stitches were out to put the Lunarich X on it. In the two weeks it grew so big it was hard to find the stitches. Just a few days putting the Lunarich X on it and it is shrinking... I messaged Dr. Galvez about what happened to her and he wasn't surprised at all. I am just so happy for my mom.

Karen B Turner

I visited with a new distributor last night. She is legally blind with macular degeneration. In the past 2 weeks her eyesight improved so she can read with a magnifying glass. Wow! She thanked me for giving her, her life back. This is a pay forward business. I can't wait for more improvement!

Keith Roberts

Since getting started on Reliv 30 months ago, I thought I had conquered the world. Now with the Lunarich X added in, I feel almost super human!!!! What a boost, no pain and continued energy throughout the day with the added benefits of deep sleep at night!!!

Renea Holly Campbell

Visiting with friend at church this morning about how she is doing on her Lunarich X capsules and she tells me her LDL cholesterol has come down 40 points in 6 weeks. Another friend has been taking the Lunarich X for high cholesterol and hers dropped from 295 to 257 in 2 months. Another friend has seen her blood pressure come down so much that her doctor has reduced her medicine.

Okay, one more LuAnn Whitmire who has MS went to her doctor this week and she does not have any new lesions. They monitor the progression of the disease by lesions that are active and the new one that show up. Her doctor is starting to take a closer look at Reliv. Lunarich is doing so much to help people manage diseases or just allow you be healthy before problems occur.

Roger Rodriguez

On the flight home from International Conference, I had a really bad toothache. Being 40,000 feet in the air is the last place you want any type of pain. I had nothing but LunaRich X capsules with me, so I took three capsules every hour until I landed in Denver for a layover. The pain went away and I'm glad I had LRX because I would have been in extreme pain without it.

Robin Shelby

I am prone to cellulitis and have been since having surgery that removed a large section of vein from my left leg 5 years ago. I felt the all too familiar pain in my foot three days ago and the following day that pain had migrated up to my knee. When the fever began I knew that it was only a matter of time before I would be back in the hospital on I.V. antibiotics. BUT...this time the fever never got very high and yesterday not only was the fever gone but also the pain. My leg never swelled. Using two scoops of Now each day and four LunaRichX capsules. Nothing surprises me at this point but I'm loving my reliv!

Dorothy Tan

I have a growing lower back pain for weeks and yesterday I had difficulty going up and down the stairs. I have been taking 1-2 capsules a day inconsistently but yesterday, I added Arthaeffect into my reliv shakes and took 3 Lunarich X before bedtime. I woke up this morning 98% pain free! This stuff works!

Myra Greene

Fast results for a downline distributor facing knee replacement. She has needed a cane for the last two years, was in constant pain due to a doctors mistake. She added LunaRichX to her 3 shake a day regimen 4 days ago. Four capsules in the morning and two at night. I talked to her last night and she is 80% pain free and sometimes 100%. How exciting!

Shalin T Clark

My friend Minnie has had ITP since the 90's, both spleens were removed and she was going to the doctor weekly for shots. The last 3 weeks she has been taking the LunaRichX, her blood pressure is good!

ACT: Alternative Cancer Treatment

NOTE: Although "ACT" is not a pharmaceutical drug or product, the company department's strict compliance policies do not allow us to mention the actual company's name and products so as not to sound like a claim, regardless of an individual's right to express freedom of speech regarding a personal experience..

REQUIRED DISCLAIMER: The statements contained in this material have not been evaluated by the Food and Drug Administration. The personal testimonials shared reflect individual experiences and are not necessarily typical of the results you may obtain. ACT products are not intended to diagnose, treat, cure or prevent any disease.

OVERALL: The research, proof and evidence are clear. Don't be limited by marketing politics. You just have to try ACT to believe...God bless.

In a meeting, a husband talked about his wife's Stage 4 kidney cancer and how she has been taking the ACT* products for three months. The doctors told her she was in excellent health!!! The entire room erupted in applause and shouted for joy.

There are no claims of cures when you take the ACT nutrition. But our bodies are the miracles. We give it the optimum nutrition, the epigenetic nutrition, and watch what happens. This is the 2nd story like this in the Twin Cities area recently, and I know of two more in the process, probably a lot more.

Her endometrial cancer showed up again after a 10 year absence. This time, in the form of an inoperable tumor in the pelvis that involved joint, muscle, and major blood vessels. It no longer responded to radiation.

In June 2013, she received the report from Mayo Clinic saying that she had 5 new thigh tumors, Her CA 125 was around 300, there were one new lung and one new liver tumor growing as well. The pelvic mass was growing quickly.

She was introduced to ACT* nutritional supplements and began on just 10 ACTcapsules

a day. The doctors at the Mayo Clinic also had her doing 2 kinds of chemo.

In mid-August of this year, she had a scan. The doctor delightedly informed her that her:

- CA 125 was down to 72
- Lung tumor was GONE
- Liver Tumor is GONE
- 4 of the 5 thigh tumors are GONE
- the 5th barely noticeable on the scan
- the inoperable mass had decreased by over 50%

Her Mayo Clinic doctor told her that he was not expecting this, as when a tumor is radiation resistant it usually ends up being chemo resistant as well. Needless to say, she will continue taking the ACT capsules, and will be doing only 1 kind of chemo this time.

Her next scan is in about 6 weeks. I will keep you posted, and keep thanking the Lord for ACT and His blessings everyday!

Shared by: Diane S.

I can't stop the tears right now... I just got this message from my friend Nicolette who was fighting Lung Cancer.

"Almost 4 months and I'm in remission with just a scar on my lung. ACT Nutritional superfood really helped. I haven't had 1 single chemo treatment. All I did was eat healthy and take ACT nutrition. I am cancer free. Also lost a few pounds but I'm more excited to be cancer free!"

Shared by: Lynette Baldwin

A 41 year old mom was diagnosed with cancer in early June.

On June 15, she attended Dr. Alfredo Galvez's presentation in California, about Lunasin and Epigenetics. She started taking 12 "ACT" capsules and 6 shakes of ACT nutritional supplement on a daily basis.

June 27, test results came back. She was informed that she had 'incurable bladder cancer' . Her blood in urine was 187. She passed a large blood clot and was rushed to hospital per her doctor. He doctor ordered another lab test. Her blood in urine had dropped to 21. The doctor expected the count to rise.

July, she completed 5 rounds of chemo. One chemo med caused aversion to any cold liquid taken. So she slowed down on taking NOW shakes but was faithful to taking 12 ACT capsules.

Sept. 26, test results came back clear. Doctor could NOT believe the results. There was NO signs of cancer in her bladder, NO lymph nodes throughout her body. She will complete 7 more chemo treatments but without the drug that caused her aversion. She will keep up with the 12 ACT capsules a day, and the 6 shakes of ACT basic nutrition.

She hopes to see Dr. Galvez in October 5 in California to say thank you. She understands that ACT is FOOD. The body needs to continue its nourishment from these fabulous products. She says she will take ACT every day for the rest of her life!

I met a gentleman on facebook that has the same name as my husband and son ... but he's in the UK ... after "friending" him (no relation that we know of) we learned he was in a serious health crisis having dealt with cancer of his face.

The cancer caused him to lose his eye and have reconstructive surgery of the face. His body/immune system has been very, very compromised and he actually lost 1/3 of his

weight because he wasn't able to eat much for 1 1/2 years.

The location where they took skin for the skin graft developed a wound that hasn't healed in 8 months and he also developed a serious wound on the top of his head that has only gotten worse in the past 3 month with a total baffling situation with the doctors in London ...

We KNEW we needed to help him and ordered "ACT" nutritional products through the UK office ... They have fewer products than the US. He started with the basic nutrition. 7 days later, at his doctor's appointment, there was a substantial difference in the head wound.

We sent the ACT capsules to him. At his next appointment, there was even more change with the head wound shrinking.

We can't wait to see what the pictures will be after the appointment tomorrow. His side wound is not showing VISIBLY that it's changing, but we know that internally it is. It's just a matter of time that the outside wound will show a difference. He is very hopeful.

I feel that the nutrition went to the most serious wound, being his head as it is close to the brain and started healing faster, but we know that every cell is getting this optimal nutrition.

What a blessing to have the best of the best nutrition that we can help this man experience better health and wellness and healing. His doctors are amazed at what is happening with his head.

We appreciate your thoughts and prayers for him and his continued healing. He is very hopeful and grateful. Thank you Dr. Carl Hastings and Dr. Fred Galvez ... two amazing & humble geniuses.

This is Powerful! I just got off the phone with a friend who had been diagnosed with breast cancer last year.

She chose NOT to do chemo radiation treatment, which is of course what all the doctors told her she must do. She used the American Anti Cancer Institute protocol (which I helped her with) and in 90 days she was cancer-free.

She recently moved to Dallas Texas and made an appointment for a complete check up, and the new doctor saw her history and was 'blown away' that she is still completely 100% cancer free and couldn't believe there was no medical treatment involved. In addition, she has come off several medications (with doctor's 100% approval) such as Cholesterol meds! She has more energy than ever before and is praising God specifically for Organo Gold Coffee!! Wow. What a blessing today.

She did take the "ACT" nutrition along with Ganoderma - coffee and capsules!

OK...I'm excited! Logan works with a man who was taking the LunaRich X capsules (12 capsules a day faithfully). He is suffering from pancreatic cancer and was given 2 months to live.

As of October, his cancer count was over 106,000. November's reading was only over 48,000 and ... get this ... I got a call from his wife last night ... she was having a bad day and got a call from his doctor, so she was expecting bad news ... his markers are at 16,400! He only has had a handful of chemo treatments because his blood work had been so bad. When his blood work was good in November, he had 1 treatment then had to wait a week as his schedule is 3 weeks chemo then 1 off.

I have never met him personally but he invited us down to see him, so we are going Wednesday night. On cloud 9!...

Why I love what I do:

10 days ago, I met a man who had Pancreatic cancer. The doctors said they couldn't do any more for him. His legs and abdomen were swollen and he couldn't get out of bed.

I started him on the Reliv nutritional products, then. Today, he walked into my home to get more Reliv products !!!!! All his swelling is gone!!! They said they can't wait to see what their doc says in two weeks.

I'd like to hear that too. — feeling happy.

Overcoming Cancer through Proper Nutrition, Prayer and Positive Attitude

Hi, my name is Merlyn del Rosario, 27 years old. I worked as a call center agent when I was diagnosed with Papillary Thyroid Cancer. It shocked my whole world because I had just given birth and then now, comes another life challenge.

A friend of mine from College contacted me through facebook and introduced ACT Nutritional supplements to me. I did not want to believe that there is such powder that can help alleviate cancer patients. I did not even consider nutrition as something very important.

In July 2011, I made a decision to undergo Total Thyroidectomy. And yes, my thyroid was removed. The doctor suggested I proceed with Radio Active Iodine treatment. He said this procedure will kill all remaining cancer cells in my thyroid area. I did not want to continue with the procedure. Instead, I took the ACT basic supplements - the Mighty 3.

The doctor told me I need to continue with the procedure because they already bought the chemo meds. Although I really have a choice not to continue, I decided to proceed with the doctor's prodding. I was isolated for over 2 weeks. While I was in the hospital I brought my ACT Mighty 3.

Being on the products, I have never felt dizzy, tired, nor have I had the headaches from the chemo. I so loved my energy.

Overcoming the Big C is easy when you practice the 3 P's. Proper Nutrition, Prayer and Positive Attitude

Taking the proper nutrition that ACT has to offer plays an important role in battling the big C. ACT is balanced and complete nutrition to be taken twice a day or even more. With my condition, I knew I needed more shakes than just twice a day.

Prayer, of course, was very significant for me. I believed that God will give us total healing. Pray to Him. Talk to Him. Ask Him for Healing and He shall give you just what you ask for.

Positive Attitude. Be happy and free yourself of worries and stress. Sickness will not have any room inside your body.

I learned more about ACT Nutrition and why it is so effective. ACT has the peptide ingredient called Lunasin. It is truly a blessing from God to be discovered by a Filipino scientist, Dr. Alfredo Galvez.

Lunasin is a natural occurring peptide found in soy plant, discovered by accident, to be anti-cancer, anti-inflammatory, that binds itself to our genes. It naturally knows which genes to turn on, and which genes to turn off before it becomes a disease.

December 24th began a long journey for my husband, Mike, with 8-9 hour nose bleeds and many trips to ER.

In February, after many test, he was diagnosed with AML (leukemia). He was told he had 8 weeks to live. He chose to use ACT* product with superfood Lunasin during chemo. He avoided most side effects. The nurses said he looked like he was the visitor and not the patient.

Chemo did cause an intestinal bleed, but the ACT products helped his body to heal. He has no bleeding now. He came home after 33 days in the hospital. The immune system was weak and he couldn't be around anyone as his neutrophils were only 500 (they fight infection). His platelets had reached 175,000 (150,000 to 400,000 is in normal ranges). One week home and still flooding his body with ACT shakes and capsules, his blood test showed neutrophils at 4400 and platelets at 392,000. We were so excited, but there was one last test, the bone marrow test.

Today we were told the bone marrow shows no cancer. He says he will shovel ACT in his body if needed as he never wants to do chemo again, even though he did so well using ACT. I am grateful to the person that shared ACT with me 7 years ago. I feel everything I learned and the stories I heard gave us hope to endure such a trying time in our lives.

I am grateful to be part of a company that has such brilliant men, Dr. Galvez, Dr. Hastings and Dr. Kalogris that started it all. Grateful to our ACT family for all their prayers and support from Ryan, Bob, Scott and all corporate leaders.

There is no better company in the world.

“My son Kenny was diagnosed with a rare blood cancer and had 13 months of chemotherapy as an infant. It was a really scary time. Afterward, he had a weak immune system and often had ear infections and colds.

Doctors told me nutrition could improve Kenny's well-being, but nothing I tried worked. With Reliv, I saw health results in Kenny right away!”

Life After Reliv: “With Reliv Now® for Kids, Kenny doesn't get sick as often. His teachers have seen improvements in his classroom focus and performance. Reliv gives him the nutrition he needs to be a healthy, energetic 11-year-old!”

I just got a call from a dear friend in Hollister, Ca regarding her cousin. This is what she had to share...

A 41 year old mom was diagnosed with cancer in early June.

On June 15, she attended Dr. Alfredo Galvez's presentation in California, about Lunasin and Epigenetics. She started taking 12 LunaRich X capsules and 6 shakes of the NOW supplement on a daily basis.

June 27, test results came back. She was informed that she had 'incurable bladder cancer' . Her blood in urine was 187. She passed a large blood clot and was rushed to hospital per her doctor. He doctor ordered another lab test. Her blood in urine had dropped to 21. The doctor expected the count to rise.

July, she completed 5 rounds of chemo. One chemo med caused aversion to any cold liquid taken. So she slowed down on taking NOW shakes but was faithful to taking 12 LunaRich X capsules.

Sept. 26, test results came back clear. Doctor could NOT believe the results. There was NO signs of cancer in her bladder, NO lymph nodes throughout her body. She will complete 7 more chemo treatments but without the drug that caused her aversion. She will keep up with the 12 LunaRich X capsules a day, and the 6 shakes of Reliv NOW.

She hopes to see Dr. Galvez in October 5 in California to say thank you. She understands that Reliv is FOOD. The body needs to continue its nourishment from these fabulous products. She says she will take Reliv every day for the rest of her life!

A friend's endometrial cancer showed up again after a 10 year absence. This time, in the form of an inoperable tumor in the pelvis that involved joint, muscle, and major blood vessels.

The tumor no longer responds to radiation. In June 2013, she received the report from Mayo Clinic saying that she had 5 new thigh tumors. Her CA 125 was around 300. There were 2 new tumors growing, as well - one in the lung and one in the liver.

The pelvic mass was growing quickly. I connected her to my upline and she began on 10 LunaRich X capsules/day only. No Reliv shakes yet. The doctors at Mayo also had her doing 2 kinds of chemo.

After a scan in mid-August of this year, the Dr. delightedly told her that her CA 125 was down to 72, Lung tumor was GONE, Liver Tumor is GONE, 4 of the 5 thigh tumors are GONE, the 5th tumor was barely noticeable on the scan. The inoperable mass had decreased by over 50%.

Her Mayo Doctor told her that he was not expecting this, as when a tumor is radiation-resistant, it usually ends up being chemo-resistant, as well. She will continue on the LRX capsules and do only 1 kind of chemo this time. Her next scan is due in 6 weeks. I will keep you posted, and keep thanking the Lord for Reliv and His blessings everyday!
